## Wall Rack With 12 Pivot Hangers Assembly Instructions

Installation recommended on wall studs  
or solid back wall surface.

- 1) Locate wall studs and attach rack (part 1) using six (part 4) screws. If you cannot locate wall studs we suggest you attach the rack to a solid wall surface. If you cannot locate the studs or are unable to attach to a solid wall surface, we suggest that you have the rack installed by a professional using hollow wall anchors.

- 2) Guide hangers (part 2) with springs (part 3) into the top of the upper frame assembly as shown in diagram. Push upper end with spring into upper hole and then insert lower part of hanger into bottom hole of rack.
